

## Facility Management with Smarter Data

**VLogic** transforms the way organizations manage their facilities by aligning day-to-day operations with long-term capital planning and workplace strategies.

Configurable software solutions provide clarity and control across maintenance, compliance, budgeting, and space management—reducing risk, cutting costs, and enabling smarter decisions for the future.

As a leader in cloud-based IWMS software, **VLogic** partners with clients of all sizes across a variety of industries, including but not limited to healthcare, education, airports, government, finance, and technology.

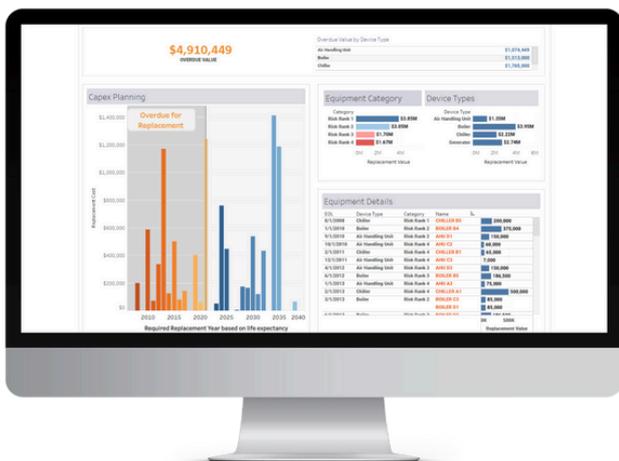

Unlike rigid legacy systems, **VLogic** makes facility data usable and accessible - backed by decades of expertise.

An in-house team of drafters, field engineers, and customer success team provides hands-on implementation and dedicated 24/7/365 support that is never outsourced.

Core components of **VLogic** can be utilized as standalone solutions or collaboratively to create an integrated, holistic approach to enhanced facilities management.

- Capital Project Management
- Drawing Management
- Architectural Field Verification
- Space Management
- Lease & Real Estate Management
- Maintenance & Asset Management
- Workplace & Hybrid Work Management
- Real-Time Tracking and Utilization

“The VLogic solutions will be instrumental in creating efficiencies to increase productivity and provide less downtime to properties and equipment throughout the city.”

Dave Rice, Facilities Director,  
City of Chicopee, MA

VLogic is FedRAMP® Authorized

**VLogic** offers a comprehensive suite of software solutions designed to unify facilities, real estate, and operations management. From everyday maintenance to long-term capital planning, our tools empower organizations to streamline processes, improve data visibility, and maximize ROI.

## Integrated Workplace Management System

Streamline your entire facilities and real estate operations with a single, unified platform that is easy-to-use and accessible via computer, laptop, tablet, and smartphone.

**VLogic** brings together space management, asset tracking, maintenance, and capital planning, and more, giving you real-time insights at your fingertips.

Make faster, smarter decisions, reduce operational bottlenecks, and boost collaboration across teams—all while improving efficiency and cutting costs.

## VLogic's Core Solutions

### Capital Project Management

- Intuitive tools to plan, budget, and schedule large-scale facility projects
- Real-time tracking of costs, timelines, and deliverables
- Keeps projects on time and on budget with full stakeholder transparency

### Drawing Management

- Centralized repository for storing CAD files, PDFs, and floorplans
- Easy search and version control for quick access to accurate drawings
- Reduces errors and saves time by ensuring everyone works from the latest documents

### Space Management

- Interactive visualization of office, floor, and facility layouts
- Automated allocation and utilization reporting
- Optimizes available space, lowering real estate costs and improving workplace planning

### Lease & Real Estate Management

- Centralized tracking of lease terms, renewals, and obligations
- Reporting on occupancy, costs, and property performance
- Minimizes financial risk and maximizes return on real estate investments

### Maintenance & Asset Management

- Preventive and corrective work order scheduling and tracking
- Lifecycle monitoring of equipment, systems, and infrastructure
- Extends asset life, reduces downtime, and ensures compliance

### Workplace & Hybrid Work Management

- Desk booking, room reservations, and shared space scheduling
- Integration with employee and facility calendars
- Enhances productivity and flexibility for hybrid teams while maximizing space use

### Real-Time Tracking & Utilization

- Live monitoring of room, desk, and equipment usage
- Sensor and IoT integrations for accurate utilization data
- Improves efficiency by aligning resources with actual demand

### Architectural Field Verification

- On-site verification of building conditions
- Collect data on floor layouts, building structures, and MEP equipment
- Ensures drawing accuracy, reducing costly errors and rework in projects
