

## Space Management

VLogic's Space Management solution gives you a clear, accurate, and up-to-date view of your buildings, floors, and rooms.

With verified floor plans and connected data, this software system becomes the single source of truth to answer questions, including:

- What does my space look like?
- How is my space being used?
- Who is in my space?

Easily manage department moves, update space data, and reassign teams in real time - keeping your organization agile, eliminating underused or overcrowded areas, and ensuring every square foot works at peak efficiency.

### **Ready to make the most of your space?**

Discover how VLogic can improve the way you plan, manage, and optimize your buildings — **schedule a demo today.**

## Key Features

### **CAD-Based Software**

A built-in CAD engine links floorplans to facility data, providing real-time visibility into assets, occupants, and space utilization - no Auto-CAD software or expertise is required.

### **Web-Based, Mobile Friendly**

Access and update space information anytime, anywhere on laptops, tablets, or smartphones.

### **Move Management**

Easily plan and execute department or personnel moves using accurate, up-to-date stack plans and occupant data.

### **Easy, Ongoing Drawing Updates**

Mark up drawings, track revisions, and add comments to maintain a complete, version-controlled record of facility changes.

### **Integrations into ERP/HR Systems**

Seamlessly integrate to sync employee data, cost centers, and space assignments.

### **Robust Reporting and Dashboards**

Interactive dashboards and reports provide instant insights into space utilization, occupancy, and performance metrics.

### **Location-Based Insights**

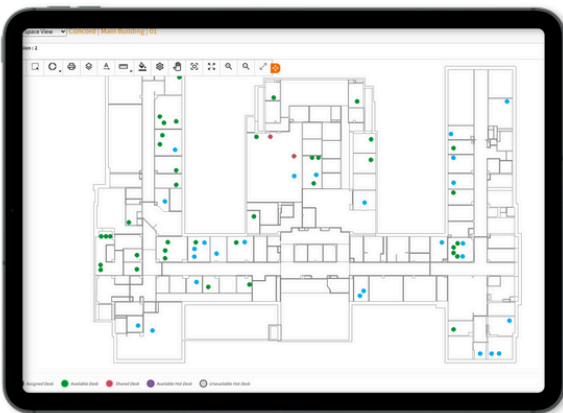

View and analyze data by room, floor, or building to understand usage patterns and identify optimization opportunities.

## Operational Impact

This scalable solution can transform how your organization operates. By combining accurate data with intuitive visualization, you can optimize every corner of your facility to support productivity, reduce costs, and improve the workplace experience. Here's how:

- **Maximized Building Utilization:** Understand how areas are occupied and ensure that rooms, floors, and buildings are neither empty or overcrowded.
- **Cost Efficiency:** With accurate space metrics you can right-size your portfolio, eliminate redundant space, and reduce wasted square footage.
- **Data-Driven Planning:** Rapid space assignments and moves reduce disruption and downtime.
- **Improved Collaboration:** Departments are empowered with visibility of where space and seats are available.
- **Compliance & Reporting:** Easily generate reports tied to regulatory or internal requirements.

## Go Live in Weeks, Not Months

All we need are your building drawings - our implementation specialists handle everything else.

From data migration and setup to training and system launch, we make the process effortless.

With hundreds of successful deployments behind us, our team delivers fast, customized implementations that are up and running in just weeks - so you can start using the solution and seeing ROI sooner.

## Why VLogic?

### Experience

With more than 20 years of experience in facility and space management, VLogic has helped organizations across industries streamline operations, optimize space utilization, and make smarter, data-driven decisions.

### Expertise

VLogic services over 40 million square feet in space management today, throughout the most regulated industries and complex building environments.

### In-House Team

VLogic is proud of its in-house team of drafters, field engineers, and customer support staff. We don't outsource our services, so we can maintain the highest quality control.
